

Karl König:
The First Three Years of the Child

How Children Learn to Walk, Speak and Think

Translated by Carlo Pietzner, newly edited and introduced by Jan Goeschel

- An examination of the three major achievements that happen during the first three years of childhood: learning to walk, speak and think
- This thorough analysis of the complex process involved in acquiring these three basic faculties will help readers better understand and support the children in their care
- This updated edition of a classic work features extensive notes and a fresh introduction, placing the text in the context of modern research

Publisher: Floris Books 192 pages Price: £14.99 ISBN: 9781782508755

In this classic work on early childhood development, Karl König explores the first three years of a child's life by examining the three major achievements that occur during this stage: learning to walk, speak and think.

These are three core faculties and their acquisition, König argues, is 'an act of grace' in every child. He goes on to provide a detailed analysis of this extraordinarily complex process.

This Karl König Archive edition now includes extensive notes and a new introduction by Dr Jan Goeschel, founding President of the Camphill Academy in North America, which puts this well-known text in the context of modern-day research.

The First Three Years of the Child provides fascinating insights into early years' development and will be of great value to educators, medical professionals and carers.
